This was then followed by the workshop by Mrs Pratit Kanchan Sahu , Associate Professor and HOD ,B.Pharm, Jeypore College of Pharmacy The goal of these workshop was to promote the humane care of animals used in biomedical and behavioural research. These guidelines provide the basic provisions for animal care in using animals for teaching or research purposes which was explained. Other information that included were adequate veterinary care must be provided and is the responsibility of a veterinarian or a person who has training or experience in laboratory animal sciences and medicine. Quarantine is the separation of newly received animals from those already in the facility until the health and possibly the microbial status of the newly received animals have been determined. Animals should be fed palatable, non-contaminated and nutritionally adequate food. Animal care programs require technical and husbandry support. Institutions should employ people trained in laboratory animal science to ensure effective implementation of the program. No animal should be used for experimentation for more than 3 years unless adequate justification is provided. All these and other aspects were also discussed apart from the above-mentioned facts.The workshop was finally concluded after the question answer session. 51 students attended

It is a production process, which needs a number of inputs to produce new knowledge and application of new and existing knowledge to generate technology that ultimately may generate economic prosperity of a nation. Simply, a research paper/report is a systematic write up on the findings of the study including methodologies, discussion, conclusions etc. following a definite style so it was discussed.

The research report writers in making the report good qualitative should remember the saying 'Try to express, not to impress' this was discussed. More elaborately and precisely, a report or systematic write up on the findings of a research study including an abstract/executive summary/summary, introduction (Background with literature review, justification, objectives etc.) methodology/materials and methods (including statistical design, if any), results and discussion, conclusions and recommendations, references etc. following a definite style or format was elaborated.

All other aspects were also discussed apart from the above-mentioned facts. The workshop was finally concluded after the question answer session. 52 students attended.

# JEYPORE COLLEGE OF PHARMACY

(Under the patronage of Banagiri Development Trust)

Approved by Government of Odisha, All India Council for Technical Education, New Delhi  
Pharmacy Council of India, New Delhi, & Affiliated to Biju Patnaik University of Technology

**Photo: One day Workshop on “Herbal Drug Validation and Overview ”**

One day workshop on “Herbal Drug Validation and Overview ” was conducted for the benefit of students as well as the staff. The program started by lighting the lamp by Principal and senior members of the institution.

This was then followed by the workshop by Dr Sangram Keshari Panda , Professor, M.Pharm, Jeypore College of Pharmacy, Jeypore ,Odisha . Standardization of polyherbal medicine though being the need of the hour is a toilsome task. Among the various methods discussed were employment for quality control and standardization of polyherbal medicine, phytochemical profiling is of utmost importance as it signifies the quality as well as efficacy of the medicine. Evidence-Based Validation of Herbal

Medicines brings together current thinking and practice in the areas of characterization and validation of natural products was stressed. This workshop showed all aspects of evaluation and development of medicines from plant sources, including their cultivation, collection, phytochemical and phyto-pharmacological evaluation, and therapeutic potential. Emphasis was placed on describing the full range of evidence-based analytical and bio-analytical techniques used to characterize natural products, including phyto-chemical analysis, hyphenated techniques, and many more.

The work shop was concluded by question answer session where the participants cleared their queries on the topic information .In total 46 participants attended the workshop and actively participated.

### ABOUT THE INSTITUTE

Jeypore College of Pharmacy founded in the year 2000, has today grown to become one of the forefront educational institutes in KBK District. Jeypore College of Pharmacy started in the year 2001. The institute is managed by Banagiri Development Trust. It is teeming with academic research, medicinal garden, canteen, play ground and personal development activities. Jeypore College of Pharmacy is one among the 33 plus Pharmacy College in Orissa, securing a place among the top ten private institutions. The Institute offers D. Pharm, ( 2 years) B. Pharm ( 4 years) and M. Pharm (Pharmaceutical Technology, Pharmaceutical Analysis & Quality Assurance, Pharmacognosy and Pharmacology) (2 years) complying with the norms of AICTE & PCI. The institution is approved by All India Council for Technical Education (AICTE), Pharmacy Council of India (PCI), Ministry of Health & Family Welfare, Government of Orissa and affiliated to Biju Patnaik University of Technology, Odisha & Orissa State Board of Pharmacy, Odisha.

#### OBJECTIVES OF THE WORKSHOP

- To test if a hypothesis is plausible or not.
- To verify of an assumption that could help develop a statistical parameter.
- To test plausible evidence in order to establish that a statistical hypothesis is true.
- To use modern technique for testing hypothesis

## One day Workshop on “Research Methodology: Modern Hypothesis testing tools”

Organized by

**Photo : One day Workshop on “Research Methodology: Modern Hypothesis testing tools”**

One day workshop “Research Methodology: Modern Hypothesis testing tools” was conducted for the benefit of students as well as the staff. The program started by lighting the lamp by Principal and senior members of the institution. A statistical hypothesis test is a method of statistical inference used to determine a possible conclusion from two different, and likely conflicting, hypotheses. In this presentation a statistical hypothesis test, a null hypothesis and an alternative hypothesis is proposed for the probability distribution of the data. If the sample obtained has a probability of occurrence less than the pre-specified threshold probability, the significance level, given the null hypothesis is true, the difference between the sample and the null hypothesis is deemed statistically significant. The hypothesis test may then lead to the rejection of null hypothesis and acceptance of alternate hypothesis. Hypothesis testing has been taught as received unified method. Surveys showed that graduates of the class were filled with philosophical misconceptions (on all aspects of statistical inference) that

persisted among instructors. While the problem was addressed, and calls for educational reform continue, students still graduate from statistics classes holding fundamental misconceptions about hypothesis testing. Ideas for improving the teaching of hypothesis testing as well as encouraging students to search for statistical errors in published papers, teaching the history of statistics and emphasizing..

The work shop was concluded by question answer session where the participants cleared their queries on the topic information .In total 45 participants attended the workshop and actively participated.

quickly and inexpensively—without compromising on quality—is difficult. Developing new products that meet

these criteria for highly regulated industries like healthcare, automotive and aerospace is an order of magnitude more challenging.

It was stressed that products in these markets must pass a variety of audits and compliance tests to ensure they can be operated without compromising the safety of the operator and others who might be negatively affected by the product's failure.

The more global your product's reach, the more national, regional and local standards you must exceed, often spawning new regional product variants and development tracks in response. As product complexity has increased, so too have the depth and complexity of the certifications themselves, in an effort to keep pace with rapidly changing features and functions was explained

These collective compliance and audit requirements takes a toll on the manufacturers trying to bring products to market, often by stifling innovation and slowing the time to market and development cost targets manufacturers need to ensure profitable growth was addressed.

The work shop was concluded by question answer session where the participants cleared their queries on the topic information .In total 48 participants attended the workshop and actively participated.
