PROMOTION OF CULTURE, HERITAGE AND HARMONY

At Jeypore College of Pharmacy, we pride ourselves on our cultural harmony and dedication to "Unity in Diversity". Doing so promotes a sense of respect and value for diversity among students. Assuring equitable outcomes for all regardless of race, culture, ethnicity, or length of stay, the program emphasizes welcoming and inclusive communities. Colleges strive to promote a multi-ethnic culture where people from different religious, racial, cultural, and linguistic backgrounds can coexist peacefully.

As a nation, we forget that diversity creates a mind of oneness in our college students, to work, learn, and live together in harmony and cooperation. As a platform for intercultural interaction and harmony, Jeypore College of Pharmacy facilitates knowledge exchange and cultural exchange among students.

A major focus of our college is knowledge exchange. Together, the students learn about new concepts of different subjects, academic programs, and new research areas. Students are encouraged to participate in various research programs on national platforms because of the exchange of knowledge. A student does their practical work as a team in laboratories, makes presentations, and works on a project in academics.

As part of the college's program, the students are encouraged to get to know the world through cultural exchange. Various cultural harmony programs are organized at Jeypore College of Pharmacy in order to encourage students to understand and exchange traditions, cultures, knowledge, etc., with others. The culture was the theme of the activities. Establish good relationships within the country and with other nationalities while learning about international cultures. Jeypore College of Pharmacy organizes many events like cultural, Sports, and Festivals to imbibe cultural harmony as well as to ensure invaluable and enjoyable participation in cultural activities that help young people a chance to develop core and life skills such as creativity, confidence, self-discipline, effective communication, and the ability to work in teams. Students act as representatives for the tasks of their interest and work on various on-campus and off- campus events. They work on all the details of the events conducted and ensure their success. The student's participation and the activities ensure the overall development of their personality. Involvement in various management and technical activities provides students with the opportunity to learn real-life problems.

GREEN CAMPUS

With an eco-friendly environment, Jeypore College of Pharmacy is surrounded by a lush green campus. In order to protect the environment from harmful pollutants. Students can concentrate on their studies in a peaceful environment, surrounded by positive thoughts and a fresh mood. Deforestation, changing climatic conditions and a decrease in water levels are causing the greenery to disappear in the present scenario. A major concern is the devastation of the environment and natural habitats due to modernization, technological development, and population growth. In light of the changing climate and the depletion of natural resources, our college has taken steps to protect the environment and focus on renewable resources. A step forward has been taken for the promotion of the green campus at Jeypore College of Pharmacy. Therefore, it motivated all students and faculty to promote a green campus not only on campus but also in the community. In order to protect the natural vegetation, the college planted trees, banned plastics, and implemented a Swatch campus. The campus has a variety of trees, plants, and herbs with medicinal values that promote health as well as refreshment for students, staff, and visitors to create positive thoughts and fresh perspectives.

Environmental awareness is continuously infused into Jeypore College of Pharmacy. Various trees were planted to convert polluted air into breathable air, arrest heat, and create a conducive environment for studies as well as protect flora and fauna. Students were taught about medicinal and herbal plants and their role in human health through planting plants and trees. Additionally, in order to conserve nonrenewable resources, solar panels were installed on the roof, generating power for various activities and supplying excess power to the grid. For the purpose of storing rainwater, we are building a water conservation facility; underground water bodies are maintained by maintaining recharge pits. Students and faculty are engaged in continuous programs to protect nature from mankind's selfish threats at our eco-friendly campus. The campus offers a message that "Clean JCP, Green JCP.". Having maintained greenery on our campus was recognized with a green campus certificate. In addition to encouraging students to cultivate a green environment on campus, Jeypore College of Pharmacy also encourages its staff to do the same.
